

KAUSHLENDRA PRATAP SINGH

Senior Data Analyst | Business Intelligence | Power BI | SQL | Python

India | +91 8178758215 | Kaushlendra242@gmail.com | github.com/Kaushlendra242 | linkedin.com/in/kaushlendra-singh-51397655/

PROFESSIONAL SUMMARY

Data and Business Analytics professional with 10+ years of experience across healthcare operations, business intelligence, KPI reporting, process improvement and stakeholder management. Hands-on expertise in SQL, Power BI, Advanced Excel, Python, data validation, dashboard development, trend analysis, root-cause analysis and forecasting. Experienced in healthcare claims analytics and performance management at Optum, combining strong business-domain knowledge with modern analytics and machine-learning capabilities.

CORE SKILLS

Business & Healthcare Analytics: Claims Analytics, Operations Analytics, KPI/MIS Reporting, Quality Monitoring, Root Cause Analysis, Process Improvement, Stakeholder Management

SQL & Databases: MySQL, MS SQL Server, Joins, CTEs, Subqueries, Aggregations, CASE, Window Functions, Views, Data Validation

BI & Reporting: Power BI, DAX, Power Query, Tableau, Advanced Excel, Interactive Dashboards, KPI Reporting, Data Visualization

Programming: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

Machine Learning: XGBoost, CatBoost, Random Forest, SVM, Regression, Classification, Clustering, SMOTE, SHAP

Tools & Deployment: Jupyter Notebook, Git, GitHub, Streamlit, Flask, Joblib, Kaggle

PROFESSIONAL EXPERIENCE

OPTUM GLOBAL SOLUTIONS PVT. LTD. | Subject Matter Expert – Claims Operations & Analytics | 2016 – Present

- Lead analytics-driven performance management for 30+ associates using KPI reporting, operational dashboards, forecasting and performance trend analysis.
- Develop SQL-, Excel- and Power BI-based reporting solutions to support leadership decisions and operational performance management.
- Build and maintain interactive Power BI dashboards covering productivity, quality, trends, operational performance and business outcomes.
- Perform trend analysis, root-cause analysis, capacity planning, KPI monitoring and claims/process analytics to identify improvement opportunities.
- Analyze recurring errors, process gaps, productivity trends and quality issues; translate findings into actionable process improvements.
- Reduced excess interest payments by 40% through analytics-driven monitoring and Power BI reporting.
- Reduced claims rework from 100 to 34 per 1,000 claims through data-driven root-cause analysis and process improvement.
- Achieved 99.85% quality through standardized monitoring, reporting, quality tracking and continuous improvement.

MYND SOLUTIONS PRIVATE LTD. | Finance Executive | 2014 – 2015

- Prepared MIS reports, aging reports, reconciliations and audit documentation to support finance operations and management reporting.
- Performed vendor invoice processing and financial documentation while maintaining data accuracy.

SELECTED ANALYTICS PROJECTS

Telecom Customer Churn Analysis | SQL | MySQL | Power BI | Excel

- Built an end-to-end customer churn analytics solution using SQL and Power BI.
- Performed data cleaning, transformation, validation, analytical querying and customer-level risk segmentation.
- Created SQL analytical views for churn risk scores and categories and built an interactive dashboard covering executive KPIs, customer drivers, revenue/contracts, segmentation and risk analysis.

GlycoTrack – Diabetes Risk Prediction | Python | XGBoost | SMOTE | SHAP | Streamlit

- Built a predictive analytics solution using 253K+ BRFSS records and compared six machine-learning approaches.
- Selected tuned XGBoost with SMOTE and achieved ROC-AUC 0.91, Recall 0.85, Precision 0.82 and F1-score 0.83.
- Applied SHAP explainability and deployed the solution using Streamlit.

Customer Satisfaction Analytics | Python | SQL | NLP | TF-IDF | SVM | Random Forest | SHAP

- Built an end-to-end support analytics solution covering satisfaction classification, resolution-time prediction, NLP, segmentation and explainability.
- Best SVM model achieved 80.9% accuracy and 0.633 Macro F1; Random Forest resolution-time model achieved RMSE 9.66 hours.

Supermart Grocery Sales Forecasting | Python | CatBoost | Feature Engineering | Streamlit

- Developed a retail sales forecasting solution using date, profit-margin, discount-impact and seasonal features.
- CatBoost achieved $R^2 > 0.60$ with RMSE approximately 300–350 and was deployed through an interactive Streamlit application.

Netflix Data Science & Recommendation | Python | NLP | TF-IDF | Cosine Similarity | Streamlit

- Built a content-based recommendation engine using title, description, genres, cast and director text.
- Performed EDA, text preprocessing, TF-IDF vectorization, similarity analysis and deployed an interactive recommendation application.

Road Accident Prediction – India 2020 | Python | CatBoost | Regression | Streamlit

- Built a regression model to predict accident incident counts across Indian cities.
- CatBoost achieved MAE 60.08, RMSE 158.34 and R^2 0.638; deployed a Streamlit application for safety and resource-planning analysis.

EDUCATION & CERTIFICATIONS

- Executive Program in Data Science & AI — SkillArbitrage | 2025
- Bachelor of Commerce — CSJM Kanpur University | 2012
- Microsoft PL-300: Power BI Data Analyst
- Business Intelligence Analyst Course — Statistics, SQL, Tableau & Database Theory
